STI Pedal pad set (AT) installation/instruction manual

⚠️ CAUTION

1. Be sure vehicle is parked in gear with the parking brake on.
2. Be sure tighten fasteners including bolts and nuts to the specified torque.
3. This part is used an adhesion bond called "Thread lock".
   When you fix the nut to the bolt, it will completely harden in 30 minutes.
   It is one time use only. If you temporarily fix the bolt, please fully tighten it within 5 minutes.

- Allen key (2.5mm)
- Wrench (5.5mm)
- Ratcheting wrench

- Wrench (7mm)
- Socket (11mm)
- Extension

4. Completion drawing of the installation

5. Installation procedures

Installation of accelerator pedal

1. Clean the OE accelerator pedal.

2. Fit ③ accelerator embossed pedal into ① accelerator pedal pad.

3. Set ⑤ accelerator bracket on the upper side of the OE accelerator pedal by covering it from the back.
(4) Set ①accelerator pedal pad on the OE accelerator pedal from the bottom.

(5) Temporarily tighten ①accelerator pedal pad and ⑤accelerator bracket with ⑨flat-head screw M4 x 10 and ⑩flat-head screw M4 x 6.
* For L.H.D. vehicle, temporarily tighten it on the left side position.

(6) Insert ⑦cap screw M3 x 42 to the prepared hole of the bolt on the side of ①accelerator pedal pad from the left side to the right side, then attach ⑧cap nut.
After checking the right and left positions (L.H.D. vehicle - the left position) of the accelerator pedal pad, tighten the cap screw until it reaches the bottom of the cap nut.

CAUTION
・Make sure to insert the screw from the left side to the right side.
・For L.H.D. vehicle, the pedal pad may interfere to vehicle floor parts if it is not on the left side position.

(7) Fully tighten ⑨flat-head screw M4 x 10 and ⑩flat-head screw M4 x 6 which are temporarily tightened in (5).

Tightening torque 2.16 ± 0.5 Nm
(1.59 ± 0.37 lb-ft)
Installation of brake pedal

(1) Remove the rubber cover of the OE brake pedal by peeling the upper side.

(2) Fit brake embossed pedal (AT) into brake pedal pad (AT).

(3) Clean the OE pedal.

(4) Insert the U-shaped groove on the underside of brake pedal pad (AT) to the genuine brake pedal from the bottom.

(5) Set brake bracket (AT) on the upper back of the OE brake pedal, and temporarily tighten with flat-head screw M4 x 16 and nut M4.

(6) Adjust the right and left positions of the OE pedal and pedal pad to be even by using a mirror. Then, fully tighten the bolt and nut.

Tightening torque  2.16 ± 0.5 Nm
(1.59 ± 0.37 lb-ft)

It is the end of the installation.
