Rockford Fosgate Audio Upgrade Kit

PART NUMBER: H630SSJ000
1. Overview of system component locations and harness routing.

2. Disconnect Negative (-) battery cable from the battery sensor terminal. Hold the battery sensor carefully when removing the 10mm nut.

3. Remove A/C Vent panels on either side of the radio.

4. Remove trim panel above radio. Please use care --- the clips are very tight.
5. Remove (4) Philips screws.

6. Pull radio away, carefully unplug connectors from radio and telematics module and set assembly aside.

**NOTE:**
Place a protective cloth over the dash and gear shifter to protect the surfaces from being scratched by the radio brackets.

7. Remove trim panels above and to the right of glove box door.
8. Remove glove box door and RH lower dash cover panel.

9. Remove glove box panel by removing (7) screws. Make sure to disconnect the glove box light.

10. Remove PASSENGER side scuff plate. Note the metal clip locations and remove the clips if they remain engaged to the vehicle body.
11. Remove PASSENGER kick panel

12. Loosen B-pillar by prying lower clip away from car.

13. Route adapter harness from radio opening into glove box as shown. Align foam tape with metal bracket.

15. Route wire as shown. White tape marks should line up with 5 highlighted wire tie locations. Secure the harness with 5 wire ties.

16. Route wire down behind black-colored connector junction aligning the foam tape as shown.
17. Route wire along door seal and place inside first two wire clamps. Open clip by sliding the top-side of the clip in the direction indicated.

18. Align tape mark as shown and secure with wire tie.

19. Feed wire under seat. Align last tape mark as shown and secure with wire tie.

20. Install the two included HVAC vent extensions over the existing vents under the front passenger seat.
21. Amp wire harness should exit the carpet from the same hole as the seat harness (as circled). Install the LH and RH air duct extensions to the vehicle under-seat air ducts (marked by arrows).

22. Place amplifier under seat aligning bracket with two threaded studs found under two relief cuts in carpet. Secure with two included nuts torqued to 7.5n/m (+/- 2). Connect harness to amplifier as shown.

23. Secure seat harness to amp bracket with included clip as shown. Ensure clip is approximately 100mm from carpet exit as highlighted.

24. Make connections at radio location. Connect the 6-pin and 10-pin connector ends that are wrapped in foam to main two stock radio connectors. Connect the 2-pin connector to the pre-arranged 2-pin connector secured to the OEM Harness with blue breakaway tape.
25. Connect adapter harness, 6-pin and 10-pin connectors to headunit. Reconnect all remaining connectors to radio and telematics module. Reinstall the radio assembly and panels to the dash, A/C vents.

26. For speaker replacement, the front two door panels will need to be removed.

27. Use a small slotted screw driver to open screw cover. Remove screw.

28. Inside the armrest pull handle, use a small slotted screw driver to open screw cover. Remove screw.
30. Pull out bottom of door panel. Lift up to release panel from door. Verify that none of the 10 clips remain in the door’s sheet metal. If there are clips remaining in the sheetmetal, remove them and reinstall them at their locations in the plastic door trim panel.

31. On the back side of the plastic door panel, unclip the door lock and door handle cables.

32. Remove all electrical connectors and carefully place door panel aside.
33. Disconnect speaker harness and remove (4) screws holding the speaker to the door. Remove the speaker and set aside.

34. Install new speaker using factory hardware and reconnect harness.

35. To install included Rockford Fosgate badges, locate mounting holes using template at end of this guide.

36. Remove masking on the backside of the badge. Position badge onto door panel.
37. Attach badge by installing retaining rings on the backside of panel.

38. Reinstall door panels and remove the masking on badge, if present.

39. Reconnect battery and test audio system for sound at all speaker locations.
