PLEASE READ THIS INSTRUCTIONS CAREFULLY, BEFORE YOU START INSTALLATION

SAFETY PRECAUTION: When installing Trailer Hitch, the use of safety glasses is recommended.

WARNING:
1. Always install the accessory following the instructions. Failure to do so may cause damage to the vehicle or the accessory.
2. Please also refer to SUBARU SERVICE MANUAL upon removing and re-assembling vehicle components.
3. Do not drill, cut, weld or otherwise modify the Trailer Hitch.
4. Do not lubricate the bolts and nuts with oil or grease.
5. If Trailer Hitch is removed, a bumper beam MUST be reinstalled. Failure to reinstall a bumper beam after removal of the trailer hitch will negatively affect vehicle rear crash performance. Please contact your SUBARU dealer.
6. When a Trailer Hitch is installed, it is not possible to install the rear towing hook.
7. Never exceed the maximum towing capacity and maximum tongue load. It could cause personal injury and/or vehicle damage.
8. When towing, total vehicle weight must not exceed the Gross Vehicle Weight Rating (GVWR). Also the load distribution on each axle must not exceed the Gross Axle Weight Rating (GAWR). The GVWR and GAWR for your vehicle can be found on the "Certification label" which is located on the left side center pillar of the vehicle.
9. For models equipped with RAB, refer to the part which indicated [RAB].
10. Ensure all recyclable discarded vehicle accessory components and packaging are recycled following local recycling regulations.
11. It is always recommended that this accessory is fitted by a qualified SUBARU technician.
12. In the engine bay, disconnect the negative battery terminal.
13. Safely store and protect any removed vehicle components.
14. Ensure all bare metal surfaces are protected using Automotive Bare Metal Primer and touch-up paint.
15. Remove all metal swarf and dust from all vehicle surfaces if surface is used for accessory installation.

Warranty is granted only when installation is done correctly by your SUBARU dealer.
SUBARU reserves the right to change the design of accessories and/or construction, illustration, and text of this manual at anytime without prior notice.

Please put installation instruction in glove box once installation is complete.
### KIT CONTENTS:

#### KIT CONTENTS:

- **A**: M14 hex flange bolt (x12)
- **B**: LH (x1)
- **C**: RH (x1)
- **D**: M14 hex flange bolt (x12)
- **E**: flat washer (x8)
- **F**: wiring harness (x1)
- **G**: foam tape (x2)
- **H**: cover panel (x2)
- **I**: cable tie (x11)
- **J**: cable tie mount (x9)
- **K**: 1/4 turn fastener assembly (x2)
- **L**: brake controller pigtail (x1)
- **M**: taillight cover panel clip (x4)

</table>
1. Raise and remove the carpeted rear floorboard

2. Remove the square panel and rubber grommet to access the spare tire winch

3. Use the spare tire wrench to turn the winch and lower the spare tire

4. Lower the spare tire to the ground.
2 REMOVE REAR BUMPER FASCIA

1. Remove the rear tail light cover (LH and RH sides) by pulling back to release 2 clips and then up to remove hook.

   ![Diagram](image1)

   Be careful not to break hook

2. Remove 2 clips per side from the inside of the tail light cover by sliding them out. Replace the clips with 2 new clips "P". Install the new clips by sliding them in until they are fully seated.

   ![Diagram](image2)

3. Remove M6 screws from bumper fascia (LH and RH sides)

   ![Diagram](image3)

4. With a screwdriver, release (1) small push pin fastener per side on the LH/RH fascia wheel well. Use the tip of the screwdriver to push the center of the pin.

   ![Diagram](image4)

5. Carefully set aside the fasteners and components where they will not be damaged. Parts will be reinstalled later.
6. With a small flat head screwdriver, remove (6) large push pin fasteners across the length of the bumper. Save push pins for later use.

7. Starting at the LH side wheel well, using both hands, pull one side of the fascia out from the vehicle.

8. Continue around the rear LH side. At the rear corner, begin to pull rearward and work across halfway across the vehicle.

9. Disconnect the RAB sensor harness connector at the LH side of the bumper beam.

10. Continue across the rear and work across the vehicle to remove the entire bumper.

11. Fully release the bumper from the vehicle body.

12. Lay fascia aside where it will not be damaged during hitch installation.
3 REMOVE REAR BUMPER BEAM

1. Remove the foam piece.

2. Disconnect and remove the RAB harness connector (a) and the smart antenna connector (b) from the top of the bumper beam on LH and RH sides.

Be careful not to damage connectors or wiring harnesses.

3. Using 14 mm deep socket, remove (3) bolts and (1) nut from each side of the bumper beam.

4. Retain (4) of the bolts for installation of cover panel.

5. Remove the bumper beam.

Be careful not to damage connectors or wiring harnesses.

If Trailer Hitch is removed, a bumper beam MUST be reinstalled. Failure to reinstall a bumper beam after removal of the trailer hitch will negatively affect vehicle rear crash performance. Please contact your SUBARU dealer.

6. Reinstall (1) nuts and (1) bolts on each side in the location shown.

7. Apply touch up paint on the bare metal areas around the bolts to avoid corrosion.
INSTALL LH / RH FRAME BRACKET ASSEMBLIES - PARTS "B" & "C"

1. Remove (1) rubber grommets (a) and (2) adhesive patches (b) per side from the bottom of the side frame.

2. Place LH welded bracket assembly "B" into side frame hole opening.

3. Align the bracket holes with the holes in the frame rail.

4. Loosely install (3) M14 bolts "D" and washers "E" first through the (1) bottom frame hole followed by the (2) side frame holes.

5. Repeat steps #2-4 for the RH side bracket assembly "C".

Be careful to avoid interference with exhaust hanger.
6. If already connected, separate the 7-pin connector from the wiring harness "I" by pressing down on the latch to release.

7. Drape the wiring harness from Step 4-6 across the LH bracket as shown.

5 INSTALL MAIN HITCH MEMBER - PART "A"

1. Apply 4 cable tie mounts "M" to the bottom of the hitch chain plate and cross tube in the locations shown below.
   NOTE: Clean the surface before applying adhesive.
5 INSTALL MAIN HITCH MEMBER - PART "A" (CONT'D)

1. Install the main hitch "A" between the LH and RH frame bracket assemblies "B" and "C". Be sure that the wiring harness is located between the hitch and vehicle but not pinched in place.

2. Loosely install (1) M14 bolt "D" and washer "E" and on each side through the top hole in LH/RH bracket assemblies "2" and "3".

3. Loosely install (2) M14 bolts "D" on each side through the bottom holes in bracket assemblies "1" and "2".

4. Hand tighten all (6) M14 bolts on each side.
6 INSTALL COVER PANEL "M"

1. Using the (4) bolts saved in Step 3-4, install (1) panel cover "K" per side into the frame weld nuts.

7 RECONNECT RAB SENSOR HARNESS & ANTENNA CONNECTORS

1. Reinstall the RAB (a) and smart antenna (b) connectors removed in Step 3 - 2 into the tabs in the hitch bracket assemblies "2" and "3"
8 TORQUE FASTENERS

1 Torque all fasteners in the order and to the torque values as shown in the table

9 WIRING HARNESS INSTALLATION

1. Using 4 nuts, bolts, and washers (included in wiring harness kit) mount the 7-pin connector housing to the tow hitch bracket. (the hardware may be located inside the connector housing under the flip-up cover)

2. Install the 4-pin connector into the wiring harness mounting bracket on the tow hitch using the clamp bracket and hardware included in the wiring harness kit. Then plug the 7-pin connector socket into the back of the 7-pin connector

3. Run the wiring harness across the bottom length of the hitch tube and route it behind the tube at the LH bracket location.
4. Secure the wiring harness to the mounts using the remaining cable ties "L". Trim off the excess tail of the cable ties.

5. Apply a cable tie mount "M" behind the hitch tube to the rear vehicle body panel in the 2 location as shown below. Clean the vehicle surface before applying the adhesive mount.

6. Continue to route the wiring harness towards the rear LH corner of the vehicle. Route the harness behind the bracket, RAB module, and wiring.
7. Remove rear cargo tray.

8. Remove the grommet next to the air vent at the LH rear corner of the vehicle.

9. Continue to route the harness around the rear LH corner of the vehicle and below pressure vent. Pass the connector through the hole into the inside of the trunk well. Install the grommet into the hole.
Inside the rear trunk well, locate the vehicle side hitch harness connector.

Apply a cable tie mount "M" to the rear vehicle body panel in the location as shown.

Apply 2 cable tie mounts "M" in the locations as shown.

Use 5 cable ties "L" to secure the wiring harness to the cable tie mounts "M" from steps 9-5, 9-10, and 9-11.

Inside the rear trunk well, locate the vehicle side hitch harness connector.

Plug one end of the tow hitch wiring harness "I" into the vehicle side connector. Wrap the connector with 1 piece of foam tape "J". Loop the mated connector back onto itself and secure to existing trunk wiring with cable tie "L".
9 WIRING HARNESS INSTALLATION (CONTINUED)

15 From the inside of the trunk, connect the 2 ends of the trailer hitch wiring harness and wrap with a piece of foam tape "J".

16 Loop the excess wiring harness slack back onto itself and use a cable tie "L" to secure it to the hole in the body panel bracket in front of the grill panel.

17 Remove the adhesive liner from the control module and secure them to the vehicle panel.

10 FASTENER "N" INSTALLATION - REMOVABLE CENTER COVER

1 Remove the center hitch cover panel from the bumper fascia by removing (1) plastic push pins from the underside of each end. Discard the push pins.
2. Assemble the tab, spring, and retainer cup together as shown. Repeat for both sets of parts.

3. Install the tab assemblies into the center cover panel as shown. Install the split retainer ring onto the opposite of the cover panel to hold everything in place.

4. Install the clip-on receptacle onto the main bumper fascia.

5. Reinstall the center cover panel onto the main bumper fascia. Turn the tab 1/4 turn to lock the cover in place.
Always use safety chains when towing.
12 INSTALLATION INSTRUCTIONS

These instructions are an official document and an integral part of the trailer hitch. It should be stored in a glove box all the time and handed over with the vehicle if sold.

13 REINSTALLATION OF COMPONENTS

1. Reconnect RAB harness
2. Reinstall rear bumper fascia.
3. Reinstall rear tail light covers.
4. Reinstall spare tire and related components.
5. Replace rear compartment cover.

14 CAUTION

1. For further information, read vehicle's owners manual or consult your dealer or dealer's service department.
2. SUBARU accepts no liability for product defects caused by the vehicle owner or other persons and/or incorrect use.
3. After the first 600 miles, please consult with SUBARU dealer to re-check the tightness of Trailer Hitch bolts and/or nuts.
4. For models equipped with BSD (Blind Spot Detection) and RCTA (Rear Cross Traffic Alert) driving support systems, when towing a trailer, press BSD/RCTA OFF switch to deactivate the systems. The system may not operate properly due to the blocked rader waves. For details about BSD/RCTA OFF switch, refer to the owners manual "BSD/RCTA OFF switch".
5. For models equipped with RAB (Reverse Automatic Braking) system, please consult with SUBARU dealer when towing a trailer.
6. Do not exceed 16 Amp for trailer brake circuit.
7. Refer to table below for towing capacity.
